

# Greater Lansing Regional Committee for Stormwater Management

Grand River, Michigan

## GLRC MEMBERS

City of DeWitt  
City of East Lansing  
City of Grand Ledge  
City of Lansing  
City of Mason  
Delhi Charter Township  
Delta Charter Township  
DeWitt Charter Township  
Lansing Charter Township  
Meridian Charter Township  
Oneida Charter Township  
Windsor Charter Township  
DeWitt Public Schools  
Lansing Public Schools  
Clinton County  
Eaton County  
Ingham County  
Michigan State University

The Stormwater Best Management Practices training video is available for all GLRC members to use for employee training. The training focuses on good housekeeping of municipal properties and operations.

The GLRC watershed awareness display is also available for use in your public library, lobby or any event that you think is appropriate. Please utilize this tool and take the opportunity to educate the public about what they can do to prevent pollution from stormwater runoff.

## GLRC Display & Training Video

## Progress Report due to MDEQ October 1, 2011

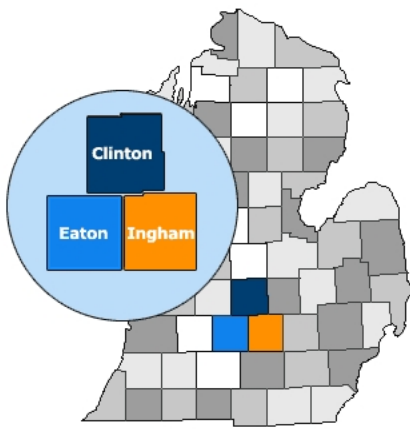

Red Cedar Stakeholder Workshop

GLRC members have been provided with a template report providing details of the last three years worth of work by the implementation committees. A significant number of action plan items have been completed and are being implemented on a regular basis. If you have any questions while completing the report, please contact Erin Campbell at 394-0342.

## Get Connected!

### With Networked Neighborhoods for Eco-Conservation Online (NECO)

#### What is NECO?

NECO is a new interactive website that helps individuals in the Great Lakes region map and share green practices that are either currently in place or that they are interested in implementing.

NECO uses both social networking and mapping tools to link people together with common goals of improving the environment in the Great Lakes Basin, their watershed, city, town or even in their own back yard. Simple installations of various green and low impact practices such as rain gardens or green roofs, can reduce runoff of stormwater, protect both groundwater and surface water and result in significant improvements in the watershed or neighborhood.

#### You can use NECO to:

- Map and showcase your green practices
- Contribute to improving the health of the Great Lakes
- Access high resolution aerial photography
- Learn more about green infrastructure and low impact practices
- Network and share photos with others
- Calculate how much water you manage with your rain barrel, rain garden, or other practice
- Generate environmental reports for your neighborhood or the Great Lakes
- View other projects near you

For more information on projects, events in your neighborhood, social networking, weather alerts, competitions and partners visit: [www.networkedneighbors.org](http://www.networkedneighbors.org)
